CAN YOU USE PLASTIC PIPE and TUBING Advantageously?

Typical installation of plastic pipe in a chemical plant, with other pipe alongside.

Plastic tubing used in fumigating boxcars.

With the right type of plastic and within the range of applications for which it is fitted, plastic pipe and tubing often possess distinct advantages over other kinds.

Thousands of chemical plants have proved this in installations which have stood up for years under conditions which no other type of pipe or tubing could endure.

Consult our Engineering Department for a frank and unbiased opinion on any application you may have in mind, or send for our new catalog No. C-47.
